

Project Development Phase
Performance Test

Date	02 July2026
Team ID	
Project Name	Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study
Maximum Marks	

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	* Primary Dataset: Student Dietary Habits & Academic Performance Survey Data. * Secondary Dataset: Cafeteria Transaction Log Tables. * Data Join: Inner join executed between Survey Records and Transaction Logs using unique Student IDs.
2.	Data Preprocessing	* Imputation: Addressed and resolved missing values in categorical fields for breakfast habits and academic stress attributes. * Standardization: Normalized mismatched dietary text inputs to ensure consistent categorization across variables
3.	Utilization of Filters	* Global Interactive Filters: Academic Major, Residential/Housing Status, and Dietary Configurations. * Action Filters: Dashboard action mapping that updates consumption charts instantly when a user selects specific stress triggers or concentration intervals.

4.	Calculation fields Used	* Academic Focus Index: Categorical grouping formula evaluating breakfast frequency against self-reported concentration levels. * Stress Index: Logical calculation mapping emotional stressors directly to comfort food reliance metrics.
5.	Dashboard design	No of Visualizations / Graphs – Total Visualizations / Graphs: 5 Elements * <i>Chart 1:</i> Correlation Matrix (Skipping Breakfast vs. Drop-offs in Concentration). * <i>Chart 2:</i> Trend Line Graph (Emotional Stressors vs. Comfort Food Reliance). * <i>Chart 3:</i> Comparative Canvas (Low Fruit/Vegetable Intake vs. High Fast-Food Volume). * <i>Chart 4:</i> Summary KPI Cards (Average Stress Score, Breakfast Attendance Rate). * <i>Chart 5:</i> Distribution Map/Bar Chart (Dietary Patterns Segmented by Major and Residency).
6	Story Design	No of Visualizations / Graphs – * <i>Story Point 1: The Academic Cost of Skipping Breakfast</i> (The narrative tracking Rahul's scenario and the breakfast-to-concentration linkage). * <i>Story Point 2: The Anatomy of Stress Eating</i> (The narrative tracking Priya's scenario mapping exam stressors to comfort food dependencies). * <i>Story Point 3: Institutional Interventions</i> (The narrative tracking the Cafeteria Manager's scenario for optimizing menus based on student trends).
