

Project Design Phase-II

Data Flow Diagram & User Stories

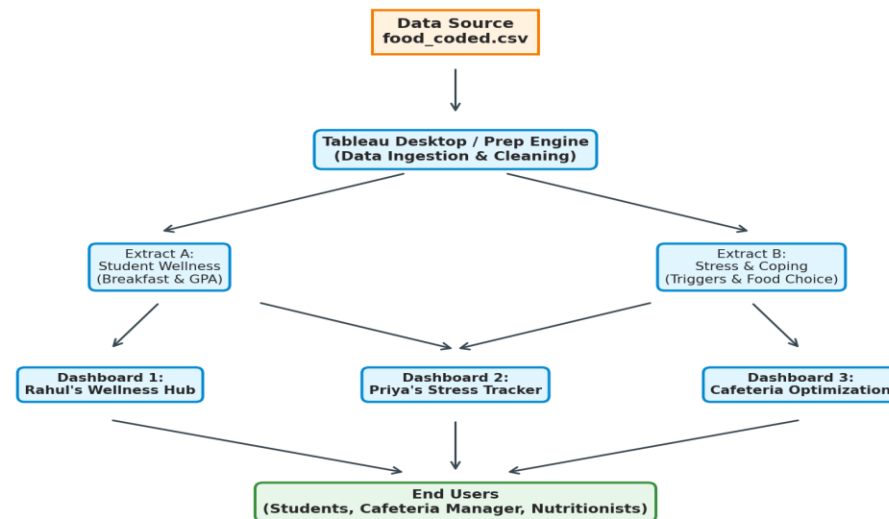

Date	29 June 2026
Team ID	
Project Name	Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. It depicts system requirements graphically by showing how data enters and leaves the system, what changes the information, and where data is stored.

Example: [\(Simplified\)](#)

Data Flow Diagram (DFD) - College Food Choices Analytics System

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
College Student	Registration	USN-1	As a busy student, I want to see the correlation between breakfast consumption and academic focus so that I can optimize my morning routine.	Dashboard explicitly charts concentration levels vs. breakfast frequency.	High	Sprint-1
College Student	Personal Health Tracking	USN-2	As a student relying on fast food, I want to explore calorie awareness metrics so that I can reduce late-night junk food consumption.	Interactive charts break down nutritional awareness by meal time.	Medium	Sprint-1
College Student	Stress & Emotional Eating	USN-3	As a stressed student during exams, I want to see how common stress-driven comfort food eating is among my peers so that I can identify healthier alternatives.	Visualization isolates "stress" and "boredom" as triggers against dietary choices.	High	Sprint-1
Cafeteria Manager	Menu Optimization	USN-4	As a cafeteria manager, I want to view student food preference trends so that I can adjust our inventory toward in-demand, healthy items.	Dashboard ranks fruit/vegetable consumption against fast food preferences.	High	Sprint-2
Cafeteria Manager	Health Interventions	USN-5	As a cafeteria manager, I want to offer balanced meal combos based on student data so that I can actively encourage healthier eating habits on campus.	The analytics system identifies low-consumption healthy categories to target with promotional combos.	Medium	Sprint-2
Nutritionist / Support Services	Institutional Wellness	USN-6	As a university nutritionist, I want to filter the dietary habits dashboard by cultural cuisine preferences so that I can tailor campus wellness programs.	A multi-dimensional filter allows segmenting survey data by lifestyle and cultural cuisine variables.	Low	Sprint-2
